

Name: Firaol Fetene

1.The Full Reset. A file currently has -rwxr-xr-x permissions. You want to change it so the Owner has Read/Write, the Group has Read-only, and Others have No Access. What is the 3-digit numeric command?

Answer: 640

2.The Executioner. You have a script with 644 permissions. You want to make it executable for everyone while keeping the Read/Write settings the same. What is the new 3-digit numeric code?

Answer: 755

3.The Secure Log. A log file needs to be writable by the Owner and Group, but readable by everyone. What is the octal command?

Answer: 664

4.Binary to Octal. If a file's binary permission string is 110 100 000, what is the corresponding chmod numeric command?

Answer: 640

5. The Mystery Code. What happens to a file if you run chmod 000 secret.txt? Can the Owner still cat the file without using sudo?

Answer: No access at all

All permissions are removed and even the owner cannot read the file without sudo.

6. File Creation. Create a file named Audit.txt and assign it the following permission: rwxr-x---.

Answer:

`touch Audit.txt && chmod 750 Audit.txt`

7. Numeric to Symbolic . What is the equivalent of a 741 permission in symbolic notation?

Answer: rwxr---x

8. Numeric to Symbolic. What is the equivalent of a 500 permission in symbolic notation?

Answer: r-x-----

9. Symbolic to Numeric .What is the numeric equivalent of -r-xrw-r--?

Answer: 564
